

Enterprise Solutions Specialist  
£36,500 to £42,932  
Parliamentary Estate

**Develop the solutions that drive a new digital democracy.**

The Parliamentary Digital Service is transforming the way Parliament does digital. We're responsible for the entire digital strategy, including development of all parliamentary platforms from intranet services to a brand new website.

As an Enterprise Solutions Specialist you'll support a large network at the heart of Parliament. That means keeping pace with our rapid technological progress by continuously developing automated solutions using PowerShell with Microsoft, Citrix and virtualisation.

Your challenges include improving the operational effectiveness and stability of the infrastructure, as well as resolving system performance and failure issues. The ability to respond effectively to fast-moving situations is essential to minimise disruption to this vital network.

To succeed you'll need experience of supporting a large-scale enterprise, including applications and server technologies. In-depth knowledge of areas such as Active Directory, virtualisation and Windows Server technologies is particularly important.

We're an open, transparent and collaborative team at the heart of Westminster. If you'd like to join us in developing a modern digital democracy, find out more [here](#)
