Consideration of Woore in the Environmental Statement

• Appropriate environmental topic assessment was applied to Woore in the Environmental Statement.
• Appendix 5 reports traffic, air quality and sound noise vibration surveys and/or assessment, including Woore.
• Volume 4 reports off-route road modifications and associated wider environmental topic effects:
  • temporary modification (for safety) at the A51/A525 junction is reported but is not a significant effect.
  • potential for likely significant effects is reported for temporary provision of passing bays on the A525 within the Woore parish - (landscape/visual effects arising from loss of parts of a sunken lane, permanent loss of vegetation and changes in landform).
• Community and socio-economic assessment are not triggered for the impact in Woore parish.
Woore Primary School

- Proposed construction traffic route on the A51 London Road passes school access.
- There is an existing signalised pedestrian crossing adjacent to school access to facilitate safe crossing.
- Nominated undertaker would ensure that a route-wide traffic management plan would be produced in consultation with the local highway authorities, the emergency services and other relevant key stakeholders.
