

The following organisations submitted evidence to the Education Committee's Special Educational Needs and Disabilities inquiry but published their submission online before the Committee published its evidence. This meant that the Committee was unable to publish the submission and list it as written evidence.

All submissions have been read, and if they are referenced in the report, will be done using the online link.

You can access their submissions using the hyperlinks below (please note, these hyperlinks were correct at the time of submission to the Committee's inquiry):
